

CLIMATE DESTABILIZATION: OUR LONG EMERGENCY

Sunday, January 27, 2019, 6:30-8:00pm

PRACTICES & ACTIONS TO CREATE RESILIENCE

4th Sunday of each month

Celebrating Two Unique Climate Leaders!

The world has recently been blessed by two unique individuals' contributions to addressing our climate crisis:

Greta Thunberg, a 15-year old Swedish student who started Strike 4 Climate, a movement which has drawn thousands of students from around the world,

and Marshall Medoff, an 81-year old eccentric inventor who has discovered a new process to make liquid fuel.

After watching a short video about each we'll turn our awareness to how our mind reacts to the variety of climate information we are bombarded with daily.

Meditation will be included as a invaluable tool to calm our mental activity.

Join us ~ Free! Open to all! No experience necessary.
