LIFE ON A SHRINKING PLANET

Life on A Shrinking Planet is a brilliant and moving film based on an article, written by Bill McKibben published in the November 26, 2018 issue of the New Yorker.

This film is a full description of the greatest threat ever to face humanity, and includes a history of climate on our planet, the role of the climate denier industry, the current state of our climate crisis, and what some best options are going forward

Join us for this informative film, followed by discussion.
