

CLIMATE DESTABILIZATION: OUR LONG SLOW EMERGENCY

Sunday, April 22, 2018, 6:30-8:00pm

**PRACTICES & ACTIONS TO CREATE RESILIENCE**

4th Sunday of each month

## **EARTH DAY: The World's Largest Environmental Movement**

Earth Day was first celebrated on April 22, 1970  
bringing public awareness to the world's environmental problems.

Across the U.S. twenty million people showed up!  
Only months later Congress enacted legislation creating  
the Environmental Protection Agency  
and the environmental movement was launched!

For Earth Day we'll honor Mother Earth  
as well as do practices to build personal resilience and discuss what's needed for greater  
earth resilience, including our discussion on how to reduce plastic consumption.
